

SINGLE SEAT TRAINING

FLEXIBLE TRAINING FOR TEAMS OF ANY SIZE

Modern material handling systems are complex, and keeping operations running at peak performance takes a well-trained workforce. Whether you're hiring new technicians or helping experienced team members continuously improve their skills, hands-on training is essential.

Single Seat Training delivers immediate, measurable impact. Your team learns by working on real equipment, guided by expert instructors who bring current, real-world experience from Dematic projects. This practical approach builds confidence, accelerates onboarding, and supports a culture of continuous improvement. With flexible, per-seat enrollment, Single Seat Training provides a convenient and cost-effective complement to Dematic's broader training portfolio, allowing organizations to access high-quality training aligned with their operational needs.

- Classes vary from 1-4 days (8 hours/day)
- Fee includes: organized curriculum + facilities + equipment + lunch
- Travel and other fees associated with attending class not included

Training takes place in Dematic's Grand Rapids, Michigan, Learning Center, in a controlled environment. There's no need to work around production schedules or risk downtime. This allows for a deeper, hands-on learning experience, beyond what's possible in a live facility. Teams train in a shared learning environment across industries, allowing exposure to varied systems and experiences.

Benefits and Features

REDUCE DOWNTIME:

Equip teams to quickly troubleshoot and resolve issues

IMPROVE PERFORMANCE:

Strengthen maintenance capabilities across mechanical and controls systems

LOWER TOTAL COST OF OWNERSHIP:

Prevent costly errors and reactive repairs

ACCELERATE ONBOARDING:

Get new hires onboarded faster with hands-on learning

INCREASE RETENTION:

Practical, real-world training drives confidence

What Attendees are Saying:

"The trainer was excellent in his approach to the class and took the time to make sure we understood the subject matter. The material being available, such as diagrams and videos, were a great touch."

"After training with Dematic, I now have the willingness and confidence to explore other elements of the system during unfortunate breakdowns."

"I've gained ample knowledge in the short amount of time that was spent with the trainers. I love and appreciate the fact they have a site where all the documents and manuals can be easily accessed."
